DETAILED ACTION

Claim Objections

1. Claim 22 is objected to under 37 CFR 1.75(c) as being in improper form because it is a multiple dependent claim. See MPEP § 608.01(n). Accordingly, this claim is not been further treated on the merits.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Van Der Spek.

Regarding claims 1, 3, Van Der Spek discloses a coiled optical fiber assembly with

features of the claimed invention including a tubular device with pressurized fluid and means for

measuring the deformation of the tube (see, for example, claim 8), using assembly of plurality of fiber optic, with Brag grating (see, for example, claim 19) and means for measuring the temperature (see, for example, claim 18).

Regarding claim 2, any assembly has a support.

Regarding claims 4-5, the assembly may have any desirable form (see, figure 5).

Regarding claims 6-7, 12, two sets of there gauges are to measure temperature and deformation (elements 11, and 12, and see, col. 4, lines 5-7).

Regarding claims 8-11, the measurements involves Brag grating.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 17-18, 20-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Van Der Spek.

Regarding claims 17-18, 21, Van Der Spek, doe not elaborate on the use of a protective covering, it would have been obvious for a skilled artisan at the time of invention was made to provide for a proper thickness, covering for the gauges in order to protect them from possible damage.

Regarding claim 20, the strain is speared.

6. Claims 13-16 and 19 are objected to, for the provision of specific casings, or the box as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

- 7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
